

CONTAMINATED

Specific Pathogen Free (SPF) Animal Room Notice

Room #

Building

Date

This room houses Specific Pathogen Free (SPF) rodents that have been found to be contaminated with the following pathogens:

Investigator	Contaminant	Treatment	Date Started	Date Finished

Post contamination new arrivals and transfers can be found in room

_____.

Labs **MUST** adhere to all **rules of entry** and **Personal Protective Equipment (PPE)** requirements which can be found posted on this door. This will aid in the prevention of additional contamination of your animals, as well as the spread of contamination to another lab's animals.

- **Depending upon the contamination, animals will be tested by ULAM before they are moved out of this room or shipped. Contact your area's veterinary resident at the number below to arrange for appropriate testing.**
- Animals testing negative can be moved to a Yellow or Green room.
- Animals testing positive should be culled, rederived, or treated.
- New Arrivals may be redirected to a Green room for the duration of the contamination.

**IF YOU ARE MANIPULATING RODENTS FROM A
CONTAMINATED ROOM, DO NOT ENTER ANY OTHER SPF
ROOMS AFTER DOING SO.**

If you have any questions or concerns regarding this contamination, please contact one of the following people:

Cherie Chang, Lea Ann Chlebek, Erin Himrod or Eric Wall at 6-1699
Your area's Veterinary Resident at 6-1696
