HAZARD CONTAINMENT ROOMS: **RODENT CAGE CHANGE ORDER**

Please refer to the yellow acetates on cages for cage manipulation order. The cage change order as outlined in the SOP must be followed for each housing room/individual cubicle. Refer to the full SOP at [az.research.umich.edu/acu-containment-sop](http://az.research.umich.edu/acu-containment-sop) for more information.

**QUESTIONS?**
Contact your facility’s ULAM Husbandry Supervisor

---

**TIER 1**
All naïve cages *(no hazardous agents administered)*

**TIER 2**
Rodent infectious substances that are **NOT** a concern to the general colony as determined by the RHST Veterinarian

**TIER 3**
Animals administered:
- Chemical hazards
- Human derived substances *(HDS)*
- Non-rodent infectious hazards *(ex. Adenovirus)*

There is no specific change order within this group

**TIER 4**
Rodent infectious substances that are **ARE** a concern to the general colony as determined by the RHST Veterinarian

---

**REMEMBER...**

**Chemical Hazard Cages**
Require full substance(s) name and date of administration

**Infectious Hazard Cages**
Require full substance(s) name and date of administration.
**Note:** for human derived substances, it is acceptable to abbreviate HDS on the orange infectious hazard sticker
