

PROTOCOL FOR DOGS, CATS, FERRETS, OR LIVESTOCK POSSIBLY EXPOSED TO RABIES

[1] If questions of exposure:

1. First call your local health department and animal control offices.
2. If they are unavailable, *during business hours*, call the Michigan Department of Agriculture and Rural Development (MDARD) at (800) 292-3939 OR the Michigan Department of Community Health (MDCH) at (517) 335-8165.
3. *After 5:00 PM and weekends*, call MDARD at (517) 373-0440 OR MDCH at (517) 335-9030.

[2] An animal is considered “currently” vaccinated against rabies if a licensed veterinarian has administered a vaccine product approved for use in that species within 12 months if it was the animal’s FIRST vaccination (First vaccination is by 4 months of age for dogs; 12 weeks for ferrets; cats are not required to be vaccinated by Michigan law, but is strongly recommended due to the predatory nature of cats). For SUBSEQUENT rabies vaccinations, *current* means administered by a veterinarian within 1 or 3 years from previous vaccination, depending on vaccine used.

[3] Livestock: Consideration should be given to vaccinating livestock that are particularly valuable. Animals that have frequent contact with humans (e.g., in petting zoos, fairs and other public exhibitions) and horses traveling interstate should be currently vaccinated.

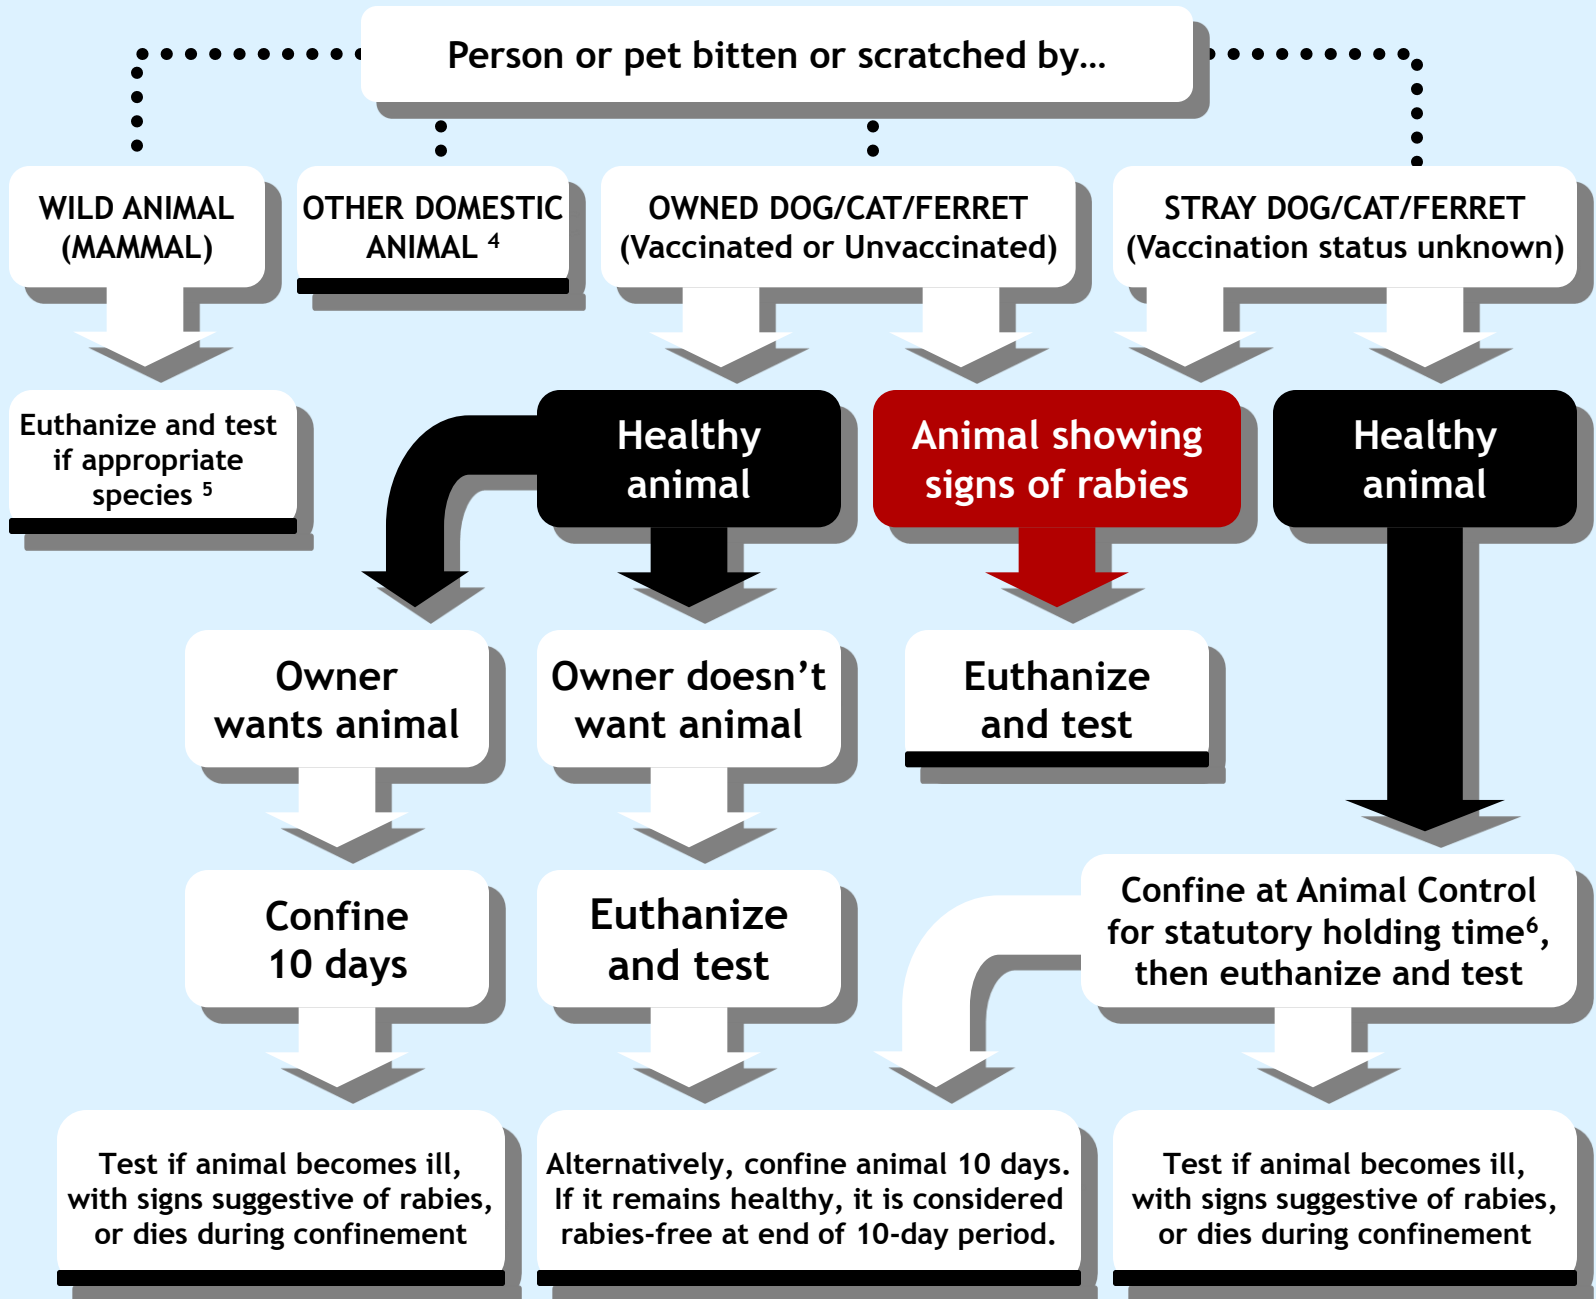

If owner refuses euthanasia of animal:

1. Advise owner of potential health risks
2. Strict quarantine for 6 months
3. Euthanize and test dog/cat/ferret/livestock for rabies if it becomes ill, with signs suggestive of rabies, or dies during confinement period
4. Vaccination may be administered at beginning of confinement, or at month 5 of confinement

RABIES PROTOCOL FOR MAMMALS WHICH HAVE BITTEN PEOPLE OR PETS

Refer person to physician
or local health department

[4] Livestock and exhibit animals that bite people are assessed individually (a separate zoo animal rabies flowchart is available @ www.michigan.gov/rabies). In all instances of other domestic animal species, contact the Michigan Department of Community Health (MDCH) at (517) 335-8165 OR notify the Michigan Department of Agriculture and Rural Development (MDARD) at (800) 292-3939.

[5] The animals listed at right are *rarely infected with rabies and have not been known to transmit rabies to humans*. These species will not be tested except by special arrangement with MDCH at (517) 335-8165. After 5:00 PM and on weekends, dial (517) 335-9030.

[6] Act 224 of 1969: Four days with no collar, license, MDARD tattoo, or other evidence of ownership; or 7 days with evidence of ownership.

CHIPMUNK	GUINEA PIG	MOUSE	RABBIT
GERBIL	HAMSTER	MUSKRAT	RAT
GOPHER	MOLE	VOLE	PRAIRIE DOG
SQUIRREL	SHREW		

Note: WOODCHUCKS are an exception to this list and are tested
