HAZARD CONTAINMENT ROOMS: RODENT CAGE CHANGE ORDER

Please refer to the yellow acetates on cages for cage manipulation order. The cage change order as outlined in the SOP must be followed for each housing room/individual cubicle. Refer to the full SOP at az.research.umich.edu/acu-containment-sop for more information.

QUESTIONS?

HAZARD CONTAINMENT ROOMS:

TIER 1
All naïve cages (no hazardous agents administered)

TIER 2
Rodent infectious agents that are NOT a concern to the general colony as determined by the RHST Veterinarian

TIER 3
Animals administered:
- Chemical agents
- Human derived substances (HDS)
- Non-rodent biological agent (ex. Adenovirus)

There is no specific change order within this group

TIER 4
Rodent infectious agents of concern to the general colony as determined by the RHST Veterinarian

REMEMBER...
Chemical Hazard Cages
Require full substances name, date of administration, and dosage/concentration

Infectious Hazard Cages
Require full substance name and date of administration
